CryptoShark (SHRK) — Whitepaper (Summary)

1. Introduction
CryptoShark (SHRK) is an AI-powered trading token designed to compound trading performance

2. Early Investor Model
- Early investors deposit BTC into managed accounts before token launch.
- The AI trading bot executes strategies 24/7 on major exchanges.
- Profits generated from trading are tracked and accounted for.
- At launch (March 8, 2026), accumulated profits are injected into SHRK liquidity and market cap

This model allows investors to benefit from trading profits immediately, even before SHRK is liv

3. AI Trading Engine
The CryptoShark AI engine:
- Scans multiple markets and pairs using quantitative signals.
- Adapts position sizing and risk dynamically.
- Targets asymmetric risk/reward opportunities.
- Operates with strict risk controls and automated monitoring.

4. Tokenomics Overview
- Token: CryptoShark (SHRK)
- Supply: 1,000,000,000 SHRK
- Launch Date: March 8, 2026
